

HOW TO EXPORT TO SKETCHFAB:

1 – In the main menu select “Export to Sketchfab...”

□ This menu item is enabled if the current scene contains at least one mesh..

2 – The first time you try to export a model to Sketchfab, the (*CONNEXION TO SKETCHFAB) window will be displayed. Once you have correctly entered your Sketchfab login information you will be immediately redirected to the export window.

If you don't have a Sketchfab account, you can select "Create a new Sketchfab account" to be redirected to the Sketchfab registration page.

After you've created a new Sketchfab account, enter your Sketchfab username (which is an email address) and your password.

Then click on "Login".

3 – After logging in the "EXPORT TO SKETCHFAB" window is displayed. In this window:

- Enter a Title
- Enter an (optional) description
- Enter optional Tags (separated by space characters) ie. Akeytsu
- Select a category
- Check "Publish as draft" if your do not want your model to be public

Note: you can change the Sketchfab account via the "Change Sketchfab account" link at the top of the screen which will then display the "CONNEXION TO SKETCHFAB" screen.

If you’re already connected, the uploaded model window will open in your Internet browser

□ If Akeytsu Sketchfab's account is account1, but Sketchfab's browser is connected to account2

- your model will be uploaded to account1
- the browser will open in account2 (where you'll see your uploaded model if it is public)
